Ladies A Word With You About Your Skin

WHY not make Cuticura Soap your every-day toilet soap, made by Cuticura Ointment and Cuticura Talcum, now and then as needed, and have in most cases a clear fresh complexion, a clean scalp free from dandruff and irritation, good hair, soft white hands and a wholesome skin free from blemish, without resorting to tins of expensive "beauty" fads? Cuticura costs little and does much. Sample each free by mail of Cuticura, Dept. N, Boston, U.S.A. Sold by dealers throughout the world.

Cuticura Talcum Powder
Do not fail to test the fascinating fragrance of this exquisitely scented face, baby, dusting and skin perfume powder, delicate, delightful, distinguishes it from the person's charm incomparable and peculiar to itself.

Britain—The World's Terminal

In his review of Great Britain's industrial and financial future, to which certain references were made in this column last week, Lord Northcliffe not only told his American interviewer of the ability being displayed in reforming the status of the industrial workers, and gave reasons why neither the United States nor any other country could succeed in taking away from Britain her supremacy in shipping, but he submitted a logical reason why England would continue to be the centre of world trade and finance. In this connection he said:

"Americans who come to London arrive here not realizing that our small country, which you can almost put inside the state of New York, is merely the great terminal of nearly a hundred diverse sections comprising the British Empire. That Empire is roughly divided into half a dozen free nations, quite independent of England,—the great collecting and distributing centre of the whole,—if they choose to be independent. If Canada, or Australia, or New Zealand wish to cut the connection tomorrow, they can do so without leaving any bad feeling behind. Sometimes there is ruffled talk between us, as there is between any other great business, but when it comes to what I understand you call a 'showdown,' it is seen that the business alliance is of the strongest.

"Never forget, too, we are linked by sentiment strong enough to unite us to death itself, as the world has lately seen, when from the remote parts of Australia, and from such widely separated places as Central Africa, the Klondike and the British Islands, came these busy Britons, who were not killed, who will give you an excellent stand-up business fight in South America and elsewhere. From all those places there flowed to France, to Palestine, to Egypt, to Asia Minor, the fine young people who farmed a portion of the land and sea armies of the British Empire, which numbered nearly eight millions, and of whom 1,000,000 were killed and missing (and missing means dead), and of whom our losses in dead officers alone amounted to 50,000.

"A people like ours, backed up by practically every single raw material the world contains, except, I understand, potash, which seems one of your weakness, too, have every rea-

son for the silent confidence they feel in the future. In addition to our supply of raw material, we have the best skilled labor in the world. I say without hesitation that, mechanic for mechanic, ours are the best, for we have practically no aliens."

Financially, Lord Northcliffe agrees with some of the best bankers in England that Great Britain does not need to borrow further from the United States. The position of the five great British banking combinations, holding amongst them 85 per cent. of the deposits of the English banks is so strong that any present or immediately prospective British trade can be financed without seeking outside help, and it is not too much to say, says the editor of Wall Street Journal, who interviewed Lord Northcliffe, that the task the great English bankers (and no country possesses greater or perhaps as great) would like to turn immediate attention to, is paying off the British national debt to the United States, irrespective of what is owing to Great Britain by her allies. And in this connection it is worthy of note, and a source of British confidence in the future, that this year Great Britain will be able to provide all national expenditures out of current taxation and still be able to make a substantial reduction in the war debt.

Concluding his statement of the British position, Lord Northcliffe made reference to a well-known characteristic of the British race. He said: "We have many faults as a people. The French say that we have the faculty of putting our worst foot foremost. We are bad advertisers. We always like to grumble. It amuses one to notice how violently we grumble at a small business loss and how quietly we pocket a gigantic business achievement. We are not good 'boosters'; but I do happen to understand something about propaganda, and having the opportunity of speaking to a great body of business men through the Wall Street Journal, I would ask the many business friends I have made at business-conventions in the United States to apply a large amount of salt to any flattery served up by young and inexperienced cable correspondents who blow into London, and, because they find an absence of the noise and rush to which they are accustomed at home, fail to realize that Mr. John Bull is back at his old stand and is about to give you a thoroughly busy time in many markets that you will find are not such easily cut lemons as some of your enthusiasts believe."

All of which should help to dissipate from the minds of Canadians, fed up with articles in the United States newspaper and magazine press, any fear that Great Britain is in danger of losing her old-time position as leader in the world of finance, shipping, manufacturing and commerce.

Driven by a gas engine, a machine has been invented that cleans old brick with a chisel at a rate of 300 an hour.

Cheap Form of Insurance

You are insured against corns and bunions by the purchase of a single 25c bottle of Putnam's Corn Extractor. It cures painlessly in 24 hours. Try Putnam's Extractor, 25c at all dealers.

We often fail to recognize it, but the fact remains that today is trying to live up to the highest standard of yesterday's thought and determination.

A Morning Dish Of Grape-Nuts

certainly does hearten one up for the day. Why shouldn't it? Grape-Nuts is ready-cooked, ready-sweetened, and contains just those good elements nature requires for the strength to do things.

BABY'S OWN TABLETS ALWAYS IN THE HOME

Once a mother has used Baby's Own Tablets for a little while she always keeps a supply on hand, for the first trial convinces her there is nothing to equal them in keeping children well. The Tablets are a mild but thorough laxative which regulate the bowels and sweeten the stomach, thus driving out constipation and indigestion, colds and simple fevers and making healthy children. Concerning them, Mrs. Saluste Pelletier, St. Dunas, Que., writes:—"I have used Baby's Own Tablets for the past ten years and am never without them in the house. They have always given the greatest satisfaction and I can gladly recommend them to all mothers of little ones." The Tablets are sold by medicine dealers or direct by mail at 25c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Cuba is the greatest consumer of raisins among Spanish-American nations.

Minard's Liniment for sale everywhere.

It has been estimated that \$5,720 pairs of old shoes are needed for every mile of a road composition made of slag, rock, asphalt and scrap leather that has been patented in Great Britain.

You Can be Cured of Catarrh

The Pure Balsamic Essences of Catarrhozone Afford Surest and Quickest Cure

Catarrhozone certain to cure because its healing vapor is carried with the breath direct to the seat of the chest, nose or throat trouble. Being composed of the purest balsams and pine essences, it immediately allays irritations, facilitates the ejection of mucus, soothes and stimulates the lungs and bronchial tubes. The marvel of the age in curing nose, throat and bronchial troubles, that's what thousands say about Catarrhozone. There is nothing so sure to cure, and to those in fear of changeable weather—those who easily catch cold—those who work among lung-chilling surroundings, or where dust, impure air, fog, or damp can affect them—let them get Catarrhozone and use it several times daily—it will cure every time.

Large size Catarrhozone, sufficient for two months' use; guaranteed, price, \$1.00; smaller size, 50c; sample size, 25c. Sold everywhere.

New Diamond Fields

Tharing Will Be Proclaimed Open for Digging March 20

Tharing, a waterless, treeless and virtually gameless desert near Taung, in Bechuanaland, promises to be the scene of the biggest diamond claim-staking rush in South African history. It is understood that Tharing will be proclaimed open for diamond digging about March 20.

Amazing stories are afloat concerning the wonderful richness of the district, and prospective diggers from the Cape, and Mozambique, and even the Congo, are preparing to try their luck in the new field. Despite warnings of possible failure, men are abandoning good jobs in various parts of the country in order to be free to stake out claims when the proclamation is issued. Hundreds of women also are arranging to go to the new diggings.

The government is preparing to cope with the anticipated rush to Tharing, and a township to receive the new community is being laid out. Taung is situated about forty miles south of Vryburg, and about one hundred miles north of Kimberley, the last-named place being famous for its great diamond mines.

May Get Part of German Naval Equipment

British Government Offers Dominion Some Reparation Claims

In the material which the allies are requiring Germany to deliver as compensation for the loss of German battleships at Scapa Flow are several floating docks, dredges, hydraulic cranes, etc. It is understood that the British Government has made enquiry of the Canadian Government as to whether Canada would like to acquire any of these on account of Canada's reparation claims, and the matter is now being considered by the government.

She Thought Dyeing Was Old Fashioned

But "Diamond Dyes" Made Her Faded, Shabby, Old Garments Like New

Don't worry about perfect results. Use "Diamond Dyes," guaranteed to give a new, rich, fadeless color to any fabric, whether it be wool, silk, linen, cotton or mixed goods,—dresses, blouses, stockings, skirts, children's coats, fashions, draperies, coverings,—everything.

The Direction Book with each package tells how to diamond dye over any color.

To match any material, have dealer show you "Diamond Dye" Color Card.

The Argentine government is planning to harness falls of the Parana river for the production of electric power.

Piles Cured in 6 to 14 Days
Druggists refund money if PIAZO OINTMENT fails to cure Itching, Blind, Bleeding or Protruding Piles. Stops Irritation, Soothes and Heals. You can get restful sleep after the first application. Price 80c.

Surveying by Aeroplane

The aeroplane in Tasmania has been used to survey a route for the erection of a transmission line capable of delivering 10,000 horsepower of electric current from the Great Lake Works to Launceston, a distance of 50 miles. No man has ever been through this part of the country. The aeroplane, which carried an engineer of the government hydro-electric department, traveled 180 miles, and flew over wild mountain peaks, rising to an altitude of 6,000 feet, over very heavily timbered country, numerous lakes, lagoons and rivers. Information, which in the ordinary way would have taken some months to obtain, owing to the forbidding nature of the country, was gained in a couple of hours.

A large part of one of Finland's iron ore fields lies under the sea.

THE ESKIMO HUTS.

They Prefer Snow to Civilized
Concrete.

The movement to modernize the Eskimo by providing him with concrete huts in place of his picturesque snow "igloos" as suggested by an official of the United States Bureau of Fisheries, would be the death of the denizens of the icy north, in the opinion of Vilhjalmur Stefansson, the Arctic explorer. Not only is the Eskimo devoted to his age-long habitation on the South Sea Islands are to their traditional garb of bower garlands and fresh smiles, but he is far healthier, warmer and more comfortable in his domed mansion of snow blocks than he could be in any modern house of concrete.

The statement that the natives of the Frobisher Islands were about to discard their snow huts for modern concrete huts, saving the gales of the Bering Sea, too strong for the former, upon which the story of the intended change of Eskimo habits was based, Mr. Stefansson characterized as too silly for discussion. The explorer said that the Frobisher Islanders had never lived in snow but in wooden huts and that further north, where the natives do live in snow houses, it would be impossible to convert them to any other dwelling.

"Their igloo serves as a home for two or three weeks. Then they build a new one. Because it is new it is clean and sanitary. It is as warm and comfortable as your library. A candle gives as much illumination as three electric lights, because of the intense whiteness of the snow. The snow house will stand under any conditions. In all, the igloo is as comfortable a home as a man could wish.

"The concrete hut, like the wooden hut, must be uncomfortable and unsanitary. Wherever the natives have changed from the snow to the wooden home there has followed pneumonia and typhoid and a tremendous increase in the death rate.

"The Eskimos are a migratory race. Contact with civilization has affected them and they are dying off. They must soon be extinct and the concrete hut hastens that extinction. The Eskimos are like the gypsies. Try to keep a gypsy in a house of concrete and see what happens.

"Still, the Eskimos might be converted to the concrete hut," went on Mr. Stefansson, smiling. "If it becomes the fashion. Should concrete homes become fashionable, all Eskimos would soon be living in them. Human nature is the same the world over. Let some one introduce the wearing of furs as a fashion, in the Zulu Islands, and the natives there would wear furs. Women wear furs in California and Florida, where the climate is just as hot as on the Zulu Islands. So you see, you never can tell."

A Shock for the Prince.

The Prince of Wales has had some embarrassing experiences during his Canadian tour, but none more so than in a small inland town when he attended a concert given in his honor. The leading townsman, a nervous old chap of seventy-six, was rather at a loss for conversation, and suggested, in a timorous voice that the prince might like to try a song. The prince—to borrow the expression of an on-looker, who had since written describing the incident—looked as if he had gone cold all over, and then, after a moment's hesitation, hinted that the leading townsman himself might like to delight the audience. The old man remained silent for the rest of the evening.—The London Spectator.

Monitor FRIDAY FEBRUARY 27 1920 Alberta

"An Exchange"

Last week our esteemed Contemporary, the Monitor News, carried an item culled from this paper re the prevalent flu in the Green Glade and Sulphur Springs district. The item was credited simply to "an Exchange." That's hardly "Cricket" Bro. Warner. It might be if you were referring to a paper published in Cape Breton or the Yukon but right here in this neck of Alberta no its hardly Cricket.

No we won't say a word about how free Provost Town is from the flu. But its simply remarkable.

Excerpt from last weeks Provost News.

The News wishes to thank the Provost News for this timely correction and information on the word "cricket." But look here, Ed, do you suppose for an instant

that the Cape Breton papers would publish the fact of there being flu or anything else in Sulphur Springs, Greenglade or Provost? The Provost News being the only paper in that vicinity, would naturally publish the news of those districts, and it is therefore natural to suppose that the Provost News was the paper referred to as "an exchange." Frankly, we fail to see what on earth you are raising such a howl about. We have plenty of our articles copied in to other weeklies, yes dailes too without it even being credited to "an exchange." No, guess yours is a case of L. B. W.

Its Up To You

Slowly but surely the epidemic of Influenza is creeping about us. March—the worst month in the year for sickness of all kinds is close at hand. Prices are going up like balloons; wages are practically standing still. Now is the time, if ever there was one, for you to protect your self, your family and your job by taking out a Sickness, Accident or both Insurance Policy. For a comparatively small sum you can assure yourself of an income when sickness has you in its grip. Your doctors bill paid when you recover and the knowledge that "they" are cared for. If you don't take advantage of this chance, don't blame anyone but yourself. Don't raise a howl after you go broke paying druggists and doctors. Be prepared—call in at the News office and let us write you a Policy now. To-morrow you may have the flu.

The Editor of the newspaper in a certain small southern town was given an article to print, praising in very elegant language the life and works of a certain Southern Colonel.

The Colonel and the Editor were not the best of friends.

The article came out, but in spelling "scarred," in that very important phrase "battle scarred veteran," one 'r' was omitted.

The Colonel threatened violence but the Editor promised to admit his error in the next issue.

In the following issue, in large type, appeared: "The Editor of this paper regrets very much an error in spelling in our last issue. In describing our most worthy Colonel, instead of 'battle scarred veteran' it should have read, 'bottle scarred veteran'."

That day the Editor ceased to edit. His wife was a widow.

The new Swedish cook, who had come into the household during the holidays, asked of her mistress:

Where have your son? I not seeing him 'round no more."

"My son," replied the mistress, pridefully, "Oh, he has gone back to Yale. I miss him dreadfully though."

"Yus, I know yooost how you feel. My brother, he have in yall six times sennee Thanksgiving."

Why

If Sleeplessness Is Your Trouble Read This

Sleeplessness is a warning of forces at war within the body—all is not harmony—something needs correction.

Nine times out of ten the body is loaded with the poisons of half eliminated and half digested food. Brain and nerves are irritated, sleep is impossible.

No prescription ever formulated produces the rapid results of Dr. Hamilton's Pills.

They flush every impurity from the body, keep every organ working well, remove the effect of loss of sleep, and set you up in a few days.

Try Dr. Hamilton's Pills today, see how much better you feel, see how much easier it is to face the day's work.

Your blood is nourished, your nerves fed with new vital power, vigor and health is sent to every part of your system.

It's because Dr. Hamilton's Pills make each organ do the work Nature expects of it, because it ensures harmony, health and vigor to the system, that it cures sleeplessness, languor, depression and nervousness.

Isn't there a reason why you should use Dr. Hamilton's Pills? Sold in 25c boxes by all dealers.

Says Agriculture and Industry Must Unite

Prof. Wallace Tells of Vast Resources of Manitoba's Great Northland

That some problems in Canada will not be solved until agriculture and industry rubs shoulders, is the opinion of Prof. Wallace, commissioner for northern Manitoba, who gave a very interesting and instructive address before the Canadian club at Brandon.

"The development of the vast resources in the northern part of our province must be carried out, and the Hudson Bay railway completed, before Canada can ever hope to realize on the huge assets which lay in the northland, the commissioner stated.

Speaking of the fur industry in northern Manitoba, Prof. Wallace stated that a conservative value on the furs exported last year was at least \$1,800,000, and this would be increased this year, as the price of furs had gone up. The possibility of large revenue from the timber lands depended solely on the development of the pulp and paper industry. Between the Grand Rapids and Saskatchewan River there is roughly about seven million cords of pulpwood, while there is about the same amount between the Grand Rapids and the Nelson River. The speaker stated, however, that it was his belief that the pulpwood industry should be commenced near Winnipeg, and then gradually work northward.

That there is over 3,500,000 horsepower waiting to be developed in the north, of which amount 2,500,000 horsepower is in the Nelson river, was another statement by the speaker. Huge mineral deposits waited development to make Manitoba one of the foremost provinces in the mining industry. Over \$2,500,000 of copper ore has been exported, and a certain property has been proved up absolutely, which contains twenty million tons of copper ore, with a value of over \$180,000,000. He stated that gold mining offered perhaps the greatest opportunities.

A huge flooded area on the banks of the Saskatchewan River had made a splendid hay meadow last year, from which over nine thousand tons of hay had been cut to help out the farmers in Saskatchewan and Alberta, and as a result of ranchers seeing the high quality of hay which came from northern Manitoba, they have now commenced to move northward and are already locating their ranches in that part of the country. The experiences of the last few years on the prairies have been such as bring farmers back into the bush country, where there will always be moisture, Prof. Wallace said.

No real development of the north could take place, however, until the Hudson Bay railway is completed.

Your Eyes

A Wholesome, Cleansing, Refreshing and Healing Lotion—Mullein for Redness, Swelling, Granulation, Itching and Burning of the Eyes or Eyelids. "By Jove!" After using this Mullin Eye Lotion you will wish your eyes were always so comfortable. Ask your Druggist for Mullin when you know how to use it. Mullin is the name of the eye medicine.

The West must urge the early completion of this road or it will never be finished, said the speaker. No railway in the next fifty years will tap such valuable territory as the Hudson Bay railway, and although the deeper waterways and power project was a good thing for Canada, Prof. Wallace reminded westerners that they should not lose sight of the great value attached to the opening up of Hudson's Bay. He also recommended the provincial administration of the natural products, it being his opinion that although the province would not handle it as well for the first few years, they would gradually perfect a system which would make for the better administration of the natural products of northern Manitoba.

Following his address, Prof. Wallace illustrated several features of his talk by the aid of lantern slides.

New Method of Shipping Stock

Association Cars Can Be Filled at Different Stations Along Railway Main Lines

Live Stock Commissioner W. W. Fraser and W. I. Smale, secretary of the Livestock Breeders' Association of Manitoba, have held a conference with the freight agents of the three Canadian lines of railway, with regard to shipping association cars of livestock. The interview was entirely satisfactory, the railways agreeing to operate cars on the basis asked for. Purchasers of livestock for shipment to all points west can take advantage of the arrangement. Rates for these cars are provided in the regular tariff. Association cars can be filled from different stations along the main line of each of the three railways. For example: Animals can be loaded at Winnipeg, Portage La Prairie, MacGregor, Carberry, Brandon, Griswold, Virden, or any other station on the main line of the C.P.R. When the car is loaded it will be carried on a through freight train until the first delivery has to be made. From there the car will be carried from point to point by way freight. By this arrangement a man will be in charge of car and deliver stock at points of delivery and re-ship on branch lines when necessary. Buyers from Western Canada desirous of taking advantage of this service will notify W. W. Fraser, livestock commissioner, Winnipeg, Man., or W. I. Smale, secretary, Livestock Association, Brandon, Manitoba.

Wired Wireless

System of Guiding Radio Currents by Means of A Wire

"Wired Wireless" is the latest. It is an invention of Major George Q. Squier, chief signal officer of the United States Army; who, by the way, has renounced all his patent rights in favor of the public because, he says, "when an army man begins to think about money, he begins to forget about the army."

The Squier method makes it possible to carry on at least ten possibly more conversations by means of a single wire and makes long distance telephone communication virtually limitless. It is stated that conversations from Rome to Rio and from Argentina to Alaska will be a matter of course, provided a single wire is strung between the points mentioned.

"Wired Wireless" is a system of guiding radio currents by means of a wire. The currents, it is explained, travel alongside of the wire, which guides them to their destination and thus eliminates the greatest fault of the ordinary wireless. The possibilities of the Squier method tax the human imagination. It will permit of talking from moving trains to friends at fixed points, and it is even said that as many as 50 messages may be sent along one wire simultaneously.—St. Thomas Times-Journal.

The green and yellow tints so frequently to be found in caterpillars are believed to be due to coloring matter derived from their food, and passed through the blood of the spinner. By impregnating leaves with artificial colors the experimenters caused some species of caterpillars to produce milk of bright orange-yellow and fine rose hues.

About ninety per cent. of the Japanese people can read and write.

MOTHERS TO BE

Should Read Mrs. Monahan's Letter Published by Her Permission.

Mitchell, Ind.—"Lydia E. Pinkham's Vegetable Compound helped me so much during the time I was looking forward to the coming of my little one that I am recommending it to other expectant mothers. Before taking it, some days I suffered with neuralgia so badly that I thought I could not live, but after taking three bottles of Lydia E. Pinkham's Vegetable Compound I was entirely relieved of neuralgia, I had gained in strength and was able to go around and do all my household work. My baby when seven months old weighed 19 pounds and I feel better than I have for a long time. I never had any medicine do me so much good as Mrs. PEARL MONTYMAN, Mitchell, Ind.

Good health during maternity is a most important factor to both mother and child, and many letters have been received by the Lydia E. Pinkham Medicine Co., Lynn, Mass., telling of health restored during this trying period by the use of Lydia E. Pinkham's Vegetable Compound.

Urge Completion Of H.B. Road

Deputation from The Pas Board of Trade Appears Before Manitoba Legislature

In the Manitoba legislature the members heard a deputation from The Pas board of trade, interested in the development of northern Manitoba. The vital necessity to this part of the province and to Western Canada of the completion of the Hudson Bay railway was argued, and I. A. Campbell, M.P. for Nelson, in supporting the claim of the deputation, said that this year there would have to be a definite decision as to who should have the natural resources. The development of northern Manitoba was being delayed and interrupted, he declared, by the present unsatisfactory state of affairs, and he expressed himself as in favor of the natural resources being handed over to the province, as it would be more directly concerned in their effective development.

Here is What the Principal Learned

DODD'S KIDNEY PILLS ARE THE REMEDY FOR KIDNEY ILLS

Principal of Saskatchewan Schools Tells Out of His Own Experience What to Do When the Kidneys are Diseased.

Webb, Sask., February 23.—(Special)—"There is one sovereign remedy for kidney disease and that remedy is Dodd's Kidney Pills is the outspoken opinion of Mr. George Hutchings, principal of the public schools here.

"I suffered for two years from diseased kidneys," Principal Hutchings states. "I was advised about a year ago to try Dodd's Kidney Pills. They have helped me more than any remedy I have ever tried. I find that my health has been greatly improved. I can conscientiously recommend Dodd's Kidney Pills to anyone suffering from kidney disease. I would not be without them."

Dodd's Kidney Pills act directly on the kidneys. They help the kidneys to do their full work of straining all the impurities out of the blood. The result is new health and energy all over the body. Ask your neighbors about Dodd's Kidney Pills.

A Pennsylvania water company has prevented the condensation of moisture on the outside of its pipes by coating them with ground cork, applied after they have been coated with a cement paint.

Bavarians are heavy drinkers, each individual in the country consuming an average of 200 quarts of beer every year.

SHILOH
30 YEARS COUGHS

Hemp Possibilities In Manitoba

A Huge Rope and Cordage Industry May Be Developed

Dr. W. J. Harrington, a member of the Manitoba legislature, is of the opinion that Manitoba may become one of the world's largest hemp-producing districts, and as a result a huge rope and cordage industry may be developed in this province.

"Hemp grown in Dauphin district last summer," he says, "was from 12 to 14 feet high when harvested, and I am given to understand that the yield in relation to the seed used was as great, if not greater, than is to be found in any part of the world where the industry has been established for years. There is an opportunity here for Manitoba to come to the front as a rope, twine, cordage and paper manufacturing province, as all these things are manufactured of hemp fibre, and I would urge upon the government the necessity of giving earnest attention to the encouragement of the industry.

"DANDERINE" FOR FALLING HAIR

For a few cents you can save your hair and double its beauty

To stop falling hair at once and rid the scalp of every particle of dandruff, get a small bottle of "delightful" "Danderine" at any drug or toilet counter for a few cents, pour a little in your hand and rub it into the scalp. After several applications the hair usually stops coming out and you can't find any dandruff. Help your hair grow strong, thick and long and become soft, glossy and twice as beautiful and abundant.

A Polar Coal Field

Spitzbergen Output From 500,000 to 1,000,000 Tons Annually

An artist in "Karikaturen," published in Christiansia, pictures a portly polar bear reading the Spitzbergen address of welcome to King Haakon of Norway, other polar bears smiling approval, and the King's boatmen, with their mitted hands on the oars, waiting impatiently till the ceremony is over and the king returns where it is warmer. The world at large knows little of Spitzbergen, which the Peace Conference awarded to Norway, but the fact that last winter the population of Arctic Ocean Archipelago numbered about 500 men, of whom more than 400 were Norwegians and the rest Swedes, combined with the statement that of late years the Norwegians have done much for the development of Spitzbergen seems to justify the award, and the cartoonist of "Karikaturen" no doubt expresses the feelings of the average Norwegian. There is coal in Spitzbergen, and the output, under proper development, has been estimated at from 500,000 to 1,000,000 tons annually but for only three months of the year and sometimes for only one, is the land free of ice and the way open for vessels.

The arctic tern is the foot-loose wanderer of the bird world. It breeds far within the Arctic circle, as far north as it can find land on which to build its nest, and spends the winter as near the South pole as it can find open water in which to find its food. Its summer and winter homes are 11,000 miles apart and necessitate an annual round trip of at least 22,000 miles. The name "Arctic" well suits it; the young have been found within 7 deg. of the pole and the nest frequently must be freed from snow.

Tuberculosis among miners has decreased since the introduction of electric power into South African gold mines.

One Big Union Takes Increase

A resolution stating that they are willing to accept the 14 per cent. increase in pay pending further negotiations which they insist must be entered into, has been adopted by the One Big Union mining district of Alberta, and forwarded to the Minister of Labor. The resolution also opposes the recent order of the fuel commissioner, requiring that all miners must be members of the United Mine Workers of America, the international organization, or leave their work.

YES! MAGICALLY! CORNS LIFT OUT WITH FINGERS

You simply say to the drug store man, "Give me a quarter of an ounce of freecorne." This will cost very little but is sufficient to remove every hard or soft corn from one's feet.

A few drops of this new ether compound applied directly upon a tender, aching corn should relieve the soreness instantly, and soon the entire corn, root and all, dries up and can be lifted out with the fingers.

This new way to rid one's feet of corns was introduced by a Cincinnati man, who says that, while freecorne is sticky, it dries in a moment, and simply shrivels up the corn without inflaming or even irritating the surrounding tissue or skin.

Don't let father die of infection or lockjaw from whitening at his corns, but clip this out and make him try it.

Mexico has a tribe of Indians whose language is limited to about 300 words, and who cannot count more than ten.

Youth and Age

THERE is no time in woman's life that she cannot benefit by the use of Dr. Chase's Nerve Food in order to keep up the supply of pure, rich blood and to ensure a healthful condition of the nervous system.

Headaches, neuralgia, sleeplessness, nervous spells, irritability, tired, worn-out feelings, soon disappear when the vigor and energy of the nerves are restored by the use of this great food cure.

50 cents a box, 6 for \$2.75, all dealers, or Edman, Bates & Co., Ltd., Toronto.

Dr. Chase's Nerve Food

Germany Defiant Over Trials Of War Criminals

Berlin.—Commenting on the allied note to Germany making concessions regarding the trial of Germans accused of war crimes, the Tageblatt says:

"The awakening of the democratic spirit in England and Italy has had its effect in inducing the leaders of the entente to recede from their previous attitude on the extradition issue."

Vorwärts says that the note is now free of malice and other obscurities, which are likely to lead to complications later, but it declares, the document represents the victory of sanity.

The Vossische Zeitung expresses belief that neither the German nor the entente statesmen could have acted differently in the premises. It thinks the entente will do well in abstaining from interference with the trials Germany is to hold, as the allies will thus be spared "the ignominious defeat awaiting them in case they attempt to reaffirm their charges before an unbiased court."

The Pan Deutsche Zeitung finds the note unacceptable, and demands that it be met with "an unflinching 'No.'"

Predicts Another Great War

Henry Morgenthau Says U.S. Must Take Her Part in Settling Up Affairs in Europe

New York.—A warning that the United States will be involved in another European war within ten years, unless she accepts her share of the responsibility of putting Europe and Asia on their feet again, was uttered by Henry Morgenthau, former ambassador to Turkey, in an address before the students of Columbia University.

Mr. Morgenthau declared that the United States in refusing to accept a mandate for Constantinople had lost an advantage which it can never gain.

After asserting that the magnificent talk of self-determination has all died away, and that the nations of Europe are "going back to the old order," the former ambassador continued: "Unless militarism is destroyed and the new order of things established, I predict that all you young men will be called upon again to bear arms in a European war, and that all of you who were too young two years ago will receive your first call for service."

Catarhal Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure Catarhal Deafness, and that is by a constitutional remedy. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing may be destroyed forever. Many cases of Deafness are caused by Catarrh, which is an inflamed condition of the Mucous Surfaces. ONE HUNDRED DOLLARS for any case of Catarhal Deafness that cannot be cured by HALL'S CATARRH MEDICINE. All Druggists 75c. Circulars free. F. J. Cheney & Co. Toledo, Ohio.

Takes Action to Prevent Strikes

Berlin.—Gustave Noske, commander-in-chief for the greater Berlin district and Brandenburg province, has issued an order applying to Berlin and Brandenburg threatening imprisonment or a fine up to \$5,000 marks for inciting persons, by speech or in writing, to stop work, which would affect the production or distribution of foodstuffs. The decree is directed against threatened strikes of the bakers and hotel-keepers.

Changes In U. S.

Immigration Laws

Would Make It Necessary for Aliens to Report and Register Every Year.

New York.—Amendment of the immigration law so as to require aliens to register and report once a year to some federal official, is one of the several recommendations made to the National Republican Club by its subcommittee on immigration.

On repeal of the laws in certain western and southern states that permit aliens to vote who have only declared their intention to become citizens, stringent regulation of the foreign language press in the United States and creation of a permanent immigration commission to study the effects of past and especially future immigration were other recommendations.

Russian Situation Bad

Ally Officials Fearful of Bolshevik Triumph in Southern War Area

Constantinople.—The situation in Southern Russia is so uncertain that the allied officials are fearful of a general Bolshevik triumph, more, however, through the internal dissensions than the entrance of Red forces from the outside.

General Schilling is at Sebastopol commanding the volunteer forces which held the Crimean isthmus.

The surrounding lagoons are frozen hard, however, and it is feared the Bolsheviks may approach on the ice.

Sebastopol harbor is cluttered with useless shipping. Ten thousand persons are registered willing to get away, while 11,000 more are on ships from Odessa without adequate food or medicine. Typhus is raging among the refugees. It is impossible to take away the population, as commanders of allied warships in the harbor apparently lack authority for such action.

An agreement has been reached between General Denikin and the Cossack supreme council. The Terek Cossacks are giving their wholehearted support, but the Don and Kuban Cossacks are making reservations which will weaken the anti-Bolshevik strength and will make the Crimean situation doubtful.

Canada's Favorable Outlook

Duke of Devonshire Paints a Bright Picture of Future of Dominion

Ottawa.—That Canada has every reason to be gratified with the present outlook, more particularly now that educationists were attacking the heavy task of carrying on a huge campaign to deepen and strengthen the moral and spiritual factors in national education, was the keynote of a speech delivered by the Duke of Devonshire, Governor-General of Canada, to the delegates to the National Council of Education here.

Dr. Parmelee, of Quebec, urged for a serious consideration of the bilingual question. If they were to have peace and harmony it was absolutely necessary that they give the French-Canadians the right to preserve their mother tongue.

British Navy Can Cope With any Emergency

Manchester Guardian Ridicules Idea of Amalgamating the Ships Built

London.—Discussing editorially Admiral Jellicoe's tour, the Manchester Guardian says it exerted a good deal of controversy in Canada, where the newspapers said that this might suggest a special building program for the Dominion and a plan for amalgamating the ships built with the British navy if the emergency should arise.

"We don't believe that any such foolish scheme is contemplated," continues the Guardian. "No emergency to begin with is conceivable with which the British navy is not amply adequate to cope, and even if it were not so, the method of shaping and directing naval policy from Whitehall for the dominions would be the worst imaginable to meet the need. It cannot be too clearly realized the tremendous help which the British overseas nations have accorded to the allied cause. So far from making the centralization, the imperial policy has given the separate members of the Commonwealth a title as they never before held toward their own destination."

"While the Dominion policy is against the inclusion as items in the plans of imperialism, and there could be no graver error of statesmanship at this time than to imagine they would meet a scheme for putting armed forces at the disposal of the imperial council with anything but profound suspicion."

Nurses Arrive From Siberia

San Francisco.—One hundred and forty American Red Cross workers arrived here from Siberia on the army transport Great Northern. Women members of the party told of their experiences with cholera at Harbin. From Harbin they went to the foothills of the Ural mountains and aided in the evacuation of the thousands of children.

Quebec.—An order-in-council has been passed by the Quebec government raising the transfer bonus for timber limits to \$20 per mile, or fraction of a mile.

Now Expected Ex-Kaiser Will Be Interned in Holland

The Hague.—The Dutch press, although inclined to resent what one newspaper calls a display of bad temper in the rather sharp wording of some parts of the second allied note with regard to the former German emperor, in its comment generally takes the view that these parts are intended only for home consumption, and that the real meaning of the note is that Holland is simply asked to prevent William from interfering with the peace of the world.

The government, the newspapers say, is undoubtedly pleased that the allies did not attempt to dictate the special place of internment. The general feeling is that the incident will be speedily settled, with Holland's expected offer to intern William at Doorn.

Hope to Secure New Beer Bill
Trenton, N.J.—In the hope of securing a beer bill for New Jersey that would stand the United States supreme court test, Senator Pilgrim, of Essex, on behalf of the Republicans in control of the legislature, introduced a measure localizing the manufacture, sale and transportation in New Jersey of beverages of 2.75 per cent. alcohol by weight, which would be about 3.40 per cent. by volume.

Americans Safe

Washington.—All Americans at Marash, in Turkey, where there have been a number of disturbances, are safe, the state department was informed in a dispatch from Constantinople.

The Spain Mine on Lot 31, in the fourth concession of the Township of Griffith, operated intermittently during the year. The production came principally from the open pit. Wilberforce Molybdenite Co., Ltd.—On lot 33 in the fifteenth concession and on part of lot 33 in the fourteenth concession of the Township of Cardiff, the above company is opening up a molybdenite prospect. A concentrator is being erected at Wilberforce.

The Sunset Mine, concession 14, Township of Brougham, is being operated by a company known as the Steel Alloys Corporation.

Molybdenum Products Co., Ltd.—This company has a capitalization of 1,075,000 shares of a par value of \$1. The mine is located in the sixteenth concession of the Township of Monmouth, in Haliburton County, about half a mile from the village of Wilberforce. A 75-ton mill is in course of construction.

Pandash Lake Molybdenite Mines, Ltd.—Mr. Joiner has also done some work on a molybdenite deposit on lot 18 in the ninth concession of Cardiff, the Mooney farm, about fifteen miles southeast of Wilberforce.

A Difference.

The Pugnacious Gentleman—"But 'e bin an' called me a 'tin'."

The Peacemaker—"Well, he may have meant it quite kindly-like, Bill. It ain't as if we was still at war with the dirty 'ounds."

He Was Wise.

"Have you any witnesses?" enquired the Judge of the negro who had been accused of stealing chickens.

"Noh, sah; ah don't take no witnesses along when ah steals chicken," was the reply.

Brazil's new president has urged on his congress the irrigation of more than 2,000,000 acres of land in the northeast of the republic, where famine has cost more than 1,000,000 lives since 1877.

HEART SO BAD WAS NOT SAFE TO LEAVE HER ALONE

Miss Eva P. Yateman, Krugersdorf, Ont., writes:—"I feel that I must write and tell you of the benefit I have received from Milburn's Heart and Nerve Pills. About four years ago I was taken terribly bad with my heart, nerves and fainting spells, and was down in bed for about six months. I doctored with two different doctors and seemed to get better, although the fainting spells would not leave me. I would take such terrible falls, wherever I was, that it was not safe to leave me at home at any time. At last I decided to resort to proprietary medicines, and took several different kinds, but seemed to receive but little benefit from them. One day noticing the advertisement of Milburn's Heart and Nerve Pills I decided to try them, and before I had taken more than two boxes I could see they were helping me. I have taken about ten boxes, and am almost cured of those terrible spells. I sincerely feel that your medicine has proved a blessing to me, and I advise any one troubled with their heart to try them, as I am confident they will find relief."

Milburn's Heart and Nerve Pills are 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Never dispute with a man more than seventy years of age, or with a woman of any age.

The world's greatest iodine works are in Chili having an annual output of 400,000 pounds.

ONLY TABLETS MARKED "BAYER" ARE ASPIRIN

Not Aspirin at All without the "Bayer Cross"

For Colds, Pain, Neuralgia, Toothache, Headache, Earache, and Rheumatism, Lumbago, Sciatica, Neuritis, take Aspirin marked with the name "Bayer" or you are not taking Aspirin at all.

Accept only "Bayer Tablets of Aspirin" in an unbroken "Bayer" package which contains complete directions. Then you are getting real Aspirin—the genuine Aspirin prescribed by physicians for over nineteen years. Now made in Canada.

Handy tin boxes containing 12 tablets cost but a few cents. Druggists also sell larger "Bayer" packages.

There is only one Aspirin—"Bayer"—You must say "Bayer"

Aspirin is the trade mark (registered in Canada) of Bayer Manufacture of Monocarbonylchloride of Salicylic Acid. While it is well known that Aspirin means Bayer manufacture, to name the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross"

Market For Toys In Great Britain

A Splendid Opportunity If Canadian Manufacturers Can Supply Demand

Toys sold on the English market at the present time have not reached a very high degree of excellence, and as the prices are very high, Canadian manufacturers have a splendid opportunity to sell large quantities in Great Britain, according to a Canadian Government trade report. The report adds that while Germany will undoubtedly be an important competitor in the British market, the manufacturers of that country will probably confine their attention as in the past to the cheaper grades of toys. In the better class of toys Canadians should find their opportunity.

Minard's Liniment Cures Dandruff

A cent up or down in the wholesale price of hides makes a difference of 16 cents a hundredweight for the beef. In old-fashioned butchering hides were often partly spoiled. In modern packing eight or ten experts take off each hide. This specialization gives a better grade leather and enables the farmer to get a better price for livestock than the local butcher can pay.

THE BEST TONIC FOR NERVOUS PEOPLE

Increase Your Nervous Energy by Building Up the Blood With Dr. Williams' Pink Pills

Nervous people who have not yet developed a disease that can be recognized and treated by the medical profession have the greatest trouble in finding relief. Irritation, headache, sleeplessness, nervous indigestion, all these discomforts make life miserable but are endured rather than run a doctor's bill without hope of recovery.

Every such sufferer should know the danger of such a condition to the nervous system. Nervous debility and even paralysis may result if the tone of the nerves is not restored by building up the blood. As a tonic for the blood and nerves Dr. Williams' Pink Pills have been used with the greatest success. They have a direct action on the blood and therefore enable it to carry to the nerve the elements they need to fully restore their normal function—and at the same time improve the general health. The benefits that follow the use of this medicine, is shown by the statement of Mrs. Jenny Marr, R.R. No. 3, Port Rowan, a well known school teacher, who says:—"Nine years ago I became really run down and was unable to condition for nearly a year. A doctor whom I called in said I was suffering from complete nervous prostration. It would hardly be possible to tell all the symptoms of my case, but any one who has passed through a nervous breakdown will know what I suffered. As I did not get any present physical condition I feel I am indebted to Dr. Williams' Pink Pills, and can heartily recommend them to anyone suffering from nervous troubles."

You can procure Dr. Williams' Pink Pills through any dealer in medicine or they will be sent you by mail at 50 cents a box, or six boxes for \$2.50 by writing direct to The Dr. Williams Medicine Co., Brockville, Ontario.

Minard's Liniment Cures Burns, Etc.

In old England, the following story admirably illustrates the industrial situation: Two miners were discussing the minimum wage.

"Say, Bill," said the first, "what's this 'ere minimum wage?"
Bill spat. "The minimum wage? That's what we gets for goin' down; an' if we wants ter make any more brass, we goes and does some work for it."

Roundly, 2,332,400 hogs were slaughtered at Government-inspected packing houses last year. The increase of 72,000 on the previous year came wholly from Ontario and Quebec. Numbers from the West dropped.

Minard's Liniment Co., Limited.
Gentlemen—My daughter, 13 yrs. old, was thrown from a sleigh and injured her elbow so badly it remained stiff and very painful for three years. Four bottles of MINARD'S LINIMENT completely cured her and she has been in perfect health for two years.

Yours truly,
J. B. LIVESQUE,

The rain that falls upon the United States annually equals the water in ten Mississippi rivers.

HOW TO "BE FIT" AT SIXTY

BY DR. LEE HERBERT SMITH.

As our boys "came marching home," they brought a certain red-blooded doctrine, and showed us the glory of a perfect body. They will show us how to "keep fit," even if we have passed middle life and are beyond the athletic stage. For the tired business man, the man who feels the daily grind and the nightly fag, has meager appetite, headaches, nerves unstrung, is gloomy; ending in a soggy brain, try the right way. Get out of bed, open the window, breathe deeply, exercise the army "setting-up" exercise or use dumb bells, until in a warm glow.

Before breakfast take hot water, and occasionally castor oil or a pleasant laxative made up of May-apple, aloin, jalap, and sold by all druggists as Dr. Pierce's Pleasant Pellets.

As Prof. Strauss says, "The excretion of uric acid we are able to effect by exciting diuresis." Drink copiously of soft rain or distilled water, six or eight glasses per day, hot water before meals, and obtain Anuric Tablets, double strength, for 50 cts., at the nearest drug store and take them three times a day. If you want a trial package send 10 cents to Dr. Pierce's Invalids' Hotel, Buffalo, N. Y. "Anuric" (anti-uric-acid) is the recent discovery of Dr. Pierce and is much more potent than lithia, for it will dissolve uric acid as hot tea dissolves sugar.

The purpose of our service to you is to help you get full performance from every implement. We carry for your benefit a full line of Implements especially adapted for use in this section. Each of them bears a trademark that assures the best of material and workmanship. With none of them do you have to run the risk of experimenting in your fields. Each is the successful result of thorough experiments carried on by the manufacturers under a variety of actual field conditions--the same conditions that prevail on your farm. Have every implement in your crop machinery reliable this year. See how we can help

The days of wool and hair are just, And those of cotton waning fast, While moss and hay are cast away. We've found a newer, cheaper way.

Excelsior.

Once, when our day of work was o'er, And we were feeling tired and sore, We used to say, "Let's hit the hay. 'Twere better form thesedays to say;

Excelsior

And when this race of life is run, when all our earthly tasks are done, When in our caskets we're confined, Behold with what the same is lined--

Excelsior.

If you want to know what a protoplasm is, ask Gid.

The Nat Bell Chinook struck town this week proving a great boon to citizens and some cattle also. Craig's cow was sick and Peter Dawson, V.S. (very scotch) was called to the rescue. Later in the afternoon the cow recovered and Newman was stricken with the same malady. Same doctor attended both--both recovered.

Whale 2,000 Miles Inland.

Dawson, Yukon Territory, is excited by a report that a whale was seen in the Yukon river at the mouth of Sixty Mile river, a little south of that city and 2,000 miles inland. Angus Cameron, a prospector, arrived in a small boat and vows he saw the big fellow playing beside the boat. A whale was killed in the Yukon at the mouth of the Tanana river two years ago after traveling 1,000 miles inland.

Transient Ads.
